ADDITIONAL INFORMATION

INTERIOR ACCESSORIES

The Uluru features our unique internal step and walkway system, a 13ft canopy with 8ft awning. There is a kitchen wall and skirt with a half front wall. The kitchen is stainless steel with built-in three-burner Smev stove and sink, a 60L Engel fridge on slide and 90L water tank with electric pump. Other features include a chest of drawers, queen innerspring mattress and bed bag, annex matting and the rear door internal air vent and two skylight panels let in plenty of air and light.

EXTERIOR ACCESSORIES

The Uluru features external access to the internal step and walkway, locked and sealed side cupboards, a stone guard, toolbox, rear mounted spare wheel, two gas bottles and jerry cans plus full gas plumbing and bayonet fitting.

ELECTRICAL

The Uluru 12 Volt pack is a standard feature and includes a 100Ah AGM battery, 25A Sinergex charger, 300W Sinergex inverter, BMV 600 battery monitor with shunt, water level indicator, eight internal lights, 12V outlets, Anderson plug and circuit breaker/fuse board – 240 is another standard feature including 240V inlet with circuit breaker and three double power points.

OPTIONAL EXTRAS

There are many optional extras, which include solar panel packages, generators, kitchen upgrades, 240V package, boat racks and motor mounts, pushbike, motorbike and quad-bike provisions, larger canopies and configuration options, fridge packs and thermal blankets.

WHAT MAKES THIS MODEL STAND OUT FROM THE REST?

This trailer is fitted with all the modern conveniences, so you are well equipped for a perfect escape. The Complete Campsite has gone further with its expertise and technology, so their customers can go further off-road. The list of inclusions is impressive and the quality and attention to detail, as with all camper trailers manufactured by The Complete Campsite, is impeccable.

WHAT MAKES THIS MODEL STAND OUT FROM THE REST?

All trailers built by The Complete Campsite are of the same build quality and workmanship. This trailer stands out, as it is an extremely heavy-duty off-road trailer that will withstand the diverse conditions of the Australian landscape. It will not only go anywhere you want it to go – it will follow you back as well.

ESSENTIAL CAMPER TRAILER TIP

Before travelling with your Complete Campsite camper trailer, it is advisable to make routine checks to ensure that everything is in travelling order. Wheel bearings, power and gas services are disconnected where necessary, stabiliser legs and step are fully upright. Most importantly, check that the coupling, electrical connection and chains are properly secured. Check that all the tail/brake/indicator lights are working properly, including the rear numberplate light.
