

Engineering & Build Quality

From start to finish it takes us two weeks to build each of our soft-floor camper trailers. We've been doing this for 20 years and we know that working faster would compromise quality control and that's not a sacrifice we're prepared to make.

Wherever possible we use Australian suppliers and components as this enables us to ensure the integrity of each product and know that all parts are suitable for harsh Australian conditions.

While our competitors come from a variety of industries and backgrounds, our expertise is grounded in a tradition of crafting rugged but sophisticated, off-road camper trailers.

As a condition of their employment, all of our production staff are required to undertake Certificate III in recreational vehicle manufacture.

We now have a team of dedicated and highly skilled designers, welders, spray

painters, electricians, sewers and production-line craftsmen who are working together in our new premises at West Gosford. (You're always welcome to come and visit us!) It's the quality of their work that enables us to offer you the rock solid guarantee of a three-year warranty.

Ease of use

Ease of use

The great attraction of our camper trailers is that you get all the fun of being under canvas but without the hassle!

If you're planning an overnight stop, our trailers can be set up by one person in about five minutes. (That's steps 1-6 in the pictures below.)

And if you've found somewhere you want to stay, you can work through all nine steps and set up the full campsite in about 15 minutes - singlehanded, thanks to the gas struts and a design that's mercifully free of guy ropes.

Comfort and Design

Comfort and Design

For twenty years we've been talking to our customers about the creature comforts they want to enjoy when they are out on the road.

If you are anything like them, you'll want to sleep well, eat well, and enjoy a comfortable, well-lit and well-ventilated environment. And you'll want enough space for your family to enjoy their holiday no matter what the weather might be doing.

That's why we are dedicated to design and ergonomics.

Take a look at our beds. We use a queen-size, inner-sprung, domestic mattress. You'd be more likely to find one in a resort than a campsite! And we've configured the trailer so that you can get into it without climbing over your partner.

If you're a foodie, you'll love our kitchens. They're beautiful - beautiful to look at, beautifully made and beautifully easy to use. Everything you might need is within easy reach - food, pots and pans, implements, plates, tableware. Everything.

And we've paid particular attention to lighting - no dingy canvas rooms. Ours are lit with skylights during the day and LEDs at night - we even provide bedside lights for reading.

It's not just a complete campsite, it's a complete home from home. It's the only tent that can actually make you feel house-proud!

Space and Configuration

Space and Configuration

Our design concept is to be small on the outside, big on the inside. (Like Dr Who's Tardis!)

We've packed masses of storage space into the trailers so that you can take everything you need with you without having to cram-pack your tow vehicle. (You need comfort while you're traveling, not just when you get there.)

On arrival, a complete campsite folds out to create a comfortably large living space. And if you need more space, you can add various canopy extensions to any of the three models.

The diagrams on this page show the different options for the Jabiru.

Technical Specifications

Main Features

- Queen size domestic innerspring mattress
- Camper sleeps 4 in comfort but larger size available for larger families
- Internal stairs and walkway for easy access to queen bed
- Large storage area in front locker for generator/chairs/tools etc
- Square box duragal internal framing for extra strength
- Gas struts fitted to internal frame for easy, 1 person set-up/pack-down
- 2 x sealed, canvas and screened doors plus 6 large windows
- Full length 3.9 m x 2.4m awning with end wall and partial return
- Internal air vent for greater air circulation
- Annex matting
- 2 x internal storage pockets to store personal belongings - keys etc
- 1 x skylight above kitchen to allow natural light to enter
- Interior and exterior lighting incl bedside reading lights
- Stainless steel and powder-coated zirconium slide out kitchen with -
 - 3 burner S/S stove, pull-out sink and pressure water
 - Large fold over bench and ample storage at arms reach
- Large slide out storage drawer beside kitchen
- 2 x 4.5kg gas bottles
- 2 x 22ltr jerry cans and 2 x spare jerry can holders
- External pressure wash tap

Power

- 12 volt
- 1 x 100 amp AGM deep cycle sealed batteries
- 240volt 15amp C-Tec 8 stage battery charger
- 150watt pure sine power inverter
- 12 volt outlets

Weights and Measures

- Overall length - 4900mm
- Overall Width - 1750mm
- Tare weight - 1000kg
- Gross weight - 1650kg

Water Supply

- 90 litre internally mounted baffled water tank plumbed to kitchen and external wash tap
- 2 x 22 Ltr Jerry cans & 2 x spare jerry can holders

Body

- Zincanneal panels and doors
- Etch primed then 2 coats of baked enamel, high quality paint
- Automotive water and dust sealing to all compartments
- Compression locks on all compartments & keyed alike
- Sikaflex in all joints and seams

Chassis/Running Gear

- 100mm x 50mm x 3mm duragal draw bar
- 50mm x 50mm x 3mm full box section chassis
- 45mm square solid axle - 1.65 tonne rating
- 10 leaf "Outback" rebound spring suspension
- 8" off-road electric brakes
- 235/75/R15 Off-road tyres - 6 stud steel rims
- Rear mounted spare tyre with tyre cover
- DO35 off-road coupling fitted with hand brake
- 4 x Drop down stabilizer legs
- 2 way level
- 12" easy mover ratchet jockey wheel
- 7 pin flat trailer plug - 50amp Anderson plug
- Stone guard
- Mud flaps
- Submersible L.E.D. tail lights
- 2 x rear recovery points
- Marine carpet lining throughout trailer

Gallery

Gallery

Over the last twenty years, our campers have explored every nook and cranny of this vast country. If you can think of a landmark, it's likely that a Complete Campsite was once set up nearby.

Some of these photographs have been provided by our more intrepid clients and we invite you to submit shots of your own holiday adventures.

Reviews

Reviews

We listen to everything that is said by our customers, the industry and the camper trailer media. That's one way in which we pursue a policy of continual improvement.

Here are some of the reviews we've received for our soft floor range.

FAQs

FAQs

Q. Why don't you have any prices listed on your website?
We do show the entry level prices for each model but most of our camper trailers are custom built so it is easier to give us a call, visit us in our showroom or at a Caravan and Camping show. We will go through your requirements and develop a package specifically to suit your needs.

Q. Do you freight interstate?
Yes we do. We frequently manufacture camper trailers and freight them to all over Australia. We have agents in WA and NSW but are not limited to these states.

Q. Do your camper trailers come with a warranty?
Yes, all of our trailers come with a 3-year warranty to give customers that extra piece of mind.

Q. How to I maintain the canvas on my tent?
The following is an extract on how to maintain the canvas on your tent. We ask our customers to follow these instructions to ensure that you get the maximum life out of your canvas.

Q. When will you be attending a caravan/ camping show near me?
Please check our shows page. It is regularly updated and contains an extensive list of our up and coming exhibitions.

Q. Are your camper trailers manufactured in Australia?
Yes, all of our camper trailers are manufactured entirely at our factory showroom in West Gosford NSW from, wherever possible, 100% Australian made materials. Our focus is on quality and we do not use cheaper imported materials. Click here to take a look at how our trailers are manufactured.

Q. Do you have options available to cater for customers with disabilities?
Yes, our camper trailers are fully customisable to suit your needs. Give us a call to discuss your requirements with us. Also, have a read of our testimonial from Brian Timewell

Q. What sort of car do I need to tow one of your camper trailers?
Pretty much any larger car can tow one of our camper trailers. Our customers have used some of the following models: Nissan X-Trail, Toyota Hilux, Subaru Outback and Forrester, Toyota Camry, Ford Falcon, Holden Commodore.
